

Tasks to solve in this exercise

1. Open a new workflow.
2. Sales Data Input:
Input the file "sales_consolidated.xlsx".
3. Filter only stores from 1:
We want to test now a time series model for one store therefore we want to filter the date to store 1.
4. ARIMA:
Use the ARIMA Tool to train the Model.
5. Evaluate Results:
Use the Browse tools to evaluate the quality of the model.
Do you get better than with the two Regression Models?
6. TS Forecast:
Use the TS Forecast tool to get predictions for the next 4 weeks with 90% - and 75% confidence intervals.

Good luck and enjoy the assignment! 😊
