Tasks to solve in this exercise

1. Open your workflow "Exercise_3"

2. Using the Multi-Field Formula tool and an IF-statement to replace the values "NA" with [Null] in both the *CPI* and the *Unemployment* column
    Hint: You can use Null() to create a null.

3. Create a groups depending on the Temperature (in Celcius) using the Tile tool with the Tile Method Smart Tile. Output the name column.

4. Filter out the rows with [Null] in the *(New_)Unemployment* column

5. Save your workflow as "Exercise_4"

Good luck and enjoy the assignment! 😊
